We utilize Adobe Photoshop and other applications (Camera Raw, Gigapixel Ai, etc.) to retouch, adjust, enhance, color balance, convert to black and white or sepia, colorize, crop, and prepare for printing. With old photos, we strive to keep the original character and feel of the original. Many times we can improve the color, contrast and density and overall look of the original. Retouching (Restorations) are billed at \$150.00 per hour, 5 minute or \$12.50 minimum. For best and most permanent final prints, we recommend Giclee (High quality archival inkjet) prints.
